John - thanks and I will look at it this week. I am traveling so it will be a little bit before I check it.

Steve

Good Morning Steve,

I have added the Cement Creek Main Stem Way Points and Misc. Waypoints. Each waypoint has a popup where you can view all of the attributes of the data. I symbolized each point on whether it had a pH value. Please let me know what else you might need.

Thanks

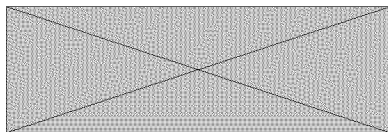

John

John - would you please add this data to the Response Viewer - site layer for the Upper Animas or Red n Bonita which ever is on the Viewer.

Marty suggested use his TDD to charge to.

Let me know if you have questions.

Thanks,
Steve

Steve,

I'm fwd you an email from Rob which has an attached spreadsheet of seeps, gps files and a draft/field map of the area of interest (Cement Creek and wetland area below the Mogul).

Although Rob would not need this information for the model, he believes the pH and SC in this area would be of interest. Based upon Rob's and my schedules it appears July 16-18 are the best dates for our OTEQ meeting. I will send another email to all parties regarding this tentative meeting. thx
